

Correction: Hybrid-Electric Design Studies for a Long-Endurance Tailsitter Concept

Author Name: J. Michael Vegh
Author Affiliations: U.S. Army Combat Capabilities Development Command Aviation & Missile Center, Moffett Field, CA 94035 USA

Correction Notice
Table 2 should be replaced with the below; the ESP_{eff} was column was not properly copied over for the original manuscript.

Propulsion System	Psp (kW/kg)	Esp (MJ/kg)	η_{tank}	η_{energy}	ESP_{eff} (MJ/kg)
Turboshaft (800 hp)	4.60	42.6	0.90	0.25	9.59
Diesel	0.85	45.6	0.90	0.37	15.18
SOFC (Propane)	0.81	50.3	0.75	0.60	22.64
Battery	4.50	1.08	0.75	0.9	0.73

Pg 11: For the sentence “Next, each aircraft was optimized, selecting the disk loading (DL), design blade loading (CW/s), wing loading (WL), tip speed, tail volume, and loiter velocity that minimized the DGW,” tail volume should be deleted.
